EDUCATION

Faculty of Computing and Technology, University of Kelaniya *September 2023 - Present*
BSc (Hons) in Computer Science - Specialization with Artificial Intelligence
Current GPA: 3.58

Advanced Level (G.C.E) *Passed in 2021*
Physical Science Stream - **Z core 1. 5287**

CARRIER OBJECTIVE

Passionate Computer Science undergraduate with interests in AI, Machine Learning, Automation, and Full-Stack Development. Seeking opportunities to apply technical and problem-solving skills to build impactful software solutions while continuously learning modern technologies.

PROJECTS

Voice to Action AI Agent Platform 🔗 *Ongoing*

Python, FastAPI, Next.js, LangGraph, Whisper, ChromaDB, Supabase, Docker, Anaconda

- Developed an AI-powered voice assistant platform capable of understanding natural voice commands and executing intelligent workflows.
- Implemented Retrieval-Augmented Generation (RAG) with ChromaDB to provide contextual memory retrieval and personalized AI interactions.
- Built modular MCP-based AI agent architecture using LangGraph and FastAPI for task automation, reminders, note management, and workflow execution.
- Integrated Whisper speech recognition for voice-to-text processing and Dockerized microservices for scalable deployment.

TechPulse AI – AI Powered IT News Blogging Platform 🔗 *2026*

Python, Anaconda, FastAPI, MongoDB, n8n, Ollama

- Developed an AI-powered IT news platform that automatically collects and categorizes technology news articles.
- Built automated workflows using n8n to fetch, process, summarize, and store news data in MongoDB.
- Integrated Ollama AI models for local AI-powered news summarization and categorization.

NewsGuard AI - Fake News Detection System 🔗 *2026*

Python, Anaconda, FastAPI, Machine Learning, MongoDB

- Developed a machine learning-based fake news detection system for identifying misleading news content.
- Built REST APIs using FastAPI and stored prediction records using MongoDB.

HallEase – Event and Hall Management System 🔗 *2025*

Next.js, Type Script, Supabase, Mailjet

- Developed a university hall booking and event management system to streamline reservation and scheduling processes.
- Designed user-friendly interfaces and implemented database connectivity for efficient hall management.

ZapVerse – Social Media Platform

2025

Spring Boot, Thymeleaf, Supabase, Azure

- Developed a university-focused social media platform for sharing text-based content and ideas.
- Built REST APIs using Spring Boot and dynamic web pages using Thymeleaf.
- Integrated Supabase PostgreSQL database and deployed the application on Azure with GitHub CI/CD integration.

TECHNICAL STRENGTHS

Programming Languages	C, Python, Java, C#
Frontend Development	HTML, CSS, JavaScript, React, Astro
Backend Development	FastAPI, PHP
ML & Data Science	Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Matplotlib
Cloud & AI Platforms	AWS, Microsoft Azure, Docker Hub, Hugging Face, Google Colab
Tools & Environment	Git, GitHub, VS Code, Jupyter Notebook, Anaconda, Docker, Linux
Databases	MongoDB, PostgreSQL, MySQL, Supabase
Automation	n8n

CERTIFICATES

- Exploratory Data Analysis With Python and Pandas (provided by Coursera)
- Linux Essentials Certification (issued by Cisco Network Academy)
- Python for Data Science, AI and Development (provided by IBM)
- Azure Fundamentals Course for Beginners (provided by ScholarHat)
- Claude Code in Action (provided by Anthropic)
- Google AI Essentials (issued by Google)
- AWS Artificial Intelligence Practitioner Learning Plan - Certificate Series (issued by AWS)
- Get Started with Anaconda (issued by Anaconda, Inc)

ORGANISATIONS

Vice President
Green Club of FCT

November 2024 - November 2025

Graphic Designer
AISEC in University of Kelaniya

February 2024 - August 2024
